Deliver best in class Tier II reporting software and services to your clients

*Deepen relationships, increase satisfaction and uncover new revenue streams*

Encamp’s EPCRA compliance platform is the only purpose built solution designed by former consultants to solve the time-consuming challenges faced by teams tasked with keeping clients on the right side of regulations, and filing thousands of Tier II reports in dozens of states each year.

By partnering with Encamp and leveraging the cloud-based EPCRA suite, you can operationalize and automate your clients’ EPCRA compliance for facilities across all 50 states and territories. Robust data ingestion and SOC 2 certification makes adopting Encamp lightning fast while maintaining strong cyber security posture.

**Partner benefits**

**Grow together**
- Increase the depth and breadth of client facility management
- Rapidly scale from pilot programs to regional and national partnerships

**Deliver like never before**
- File thousands more accurate and on-time Tier II reports using a fraction of the resources
- Present new insights only uncovered by synthesizing traditionally disparate data sources

**Manage at glance**
- Create facility-level profiles to track inventory, SDSs and retain Tier II reports and associated records for a single source of truth
- Consolidate all accounts’ reporting requirements and tasks in one place

**Affect change**
- Lead digital transformation efforts with automation
- Gain a competitive edge by adopting leading technology
- Leverage facility and regional trend data to inform new projects

“I have been very impressed with Encamp’s level of professionalism and drive. Encamp is a very important addition for us. Encamp's persistence and vision to make it happen, made it happen!”

**Allen Summers, Founder, Asmark Institute**

“We've always been dedicated to simplifying the challenging aspects of environmental health and safety for businesses. Partnering with Encamp amplifies our reach and capability.”

**Chris Cleveland, CEO, ComplyAuto**

The opportunity

EHS teams and the companies that serve them need a solution that gathers facility-level chemical data, evaluates it against federal and state thresholds and seamlessly submits the applicable reports to the correct SERCs and LEPCs, and FDs.

Only Encamp empowers partner teams to maintain compliance across their clients’ entire facility footprint without the arduous undertaking of manually logging into every portal and submitting reports, mailings, or payments.

How it works

1. Easily import years of client data into Encamp by integrating state portal accounts or uploading T2Ss files
2. Manage your clients’ data collection process within Encamp with dedicated software and data imports
3. Automatically check requirements for 33,000+ jurisdictions, review and, verify Tier II reports for submission
4. Encamp Fulfillment Engine and regulatory compliance experts complete submissions, mailers, required fee payments, and records retention
5. You are provided with documentation of submissions and fees so you can retain them and invoice accordingly

Your clients’ benefits

EPCRA Tier II Reporting
- Achieve and maintain EPCRA 302, 311, and 312 (Tier II) compliance across all 50 states and territories
- Automatically check requirements for 33,000 jurisdictions
- Retain records for submissions, mailers and fee payments in one place
- Centralized task management

Drive digital transformation
- Break down silos, unifying often disparate facility inventory and reporting data in one place
- Capture and leverage critical EHS data for ESG and Sustainability
- Surface facility and regional level insights, trends, and efficiencies
