

A walk through Encamp task management and how it can save you hours of manual effort and stress over non-compliance

Encamp Tasks is designed to help organizations manage a variety of environmental, health, and safety obligations critical for maintaining a compliant facility. Such obligations could include, but are not limited to, tasks related to internal audits, external inspections, reporting, and more. By centralizing task management, organizations can ensure that no environmental compliance obligation slips through the cracks, paving the way for a robust, forward-looking and modern program.

Regain control and visibility of site-level and corporate processes by assigning one-off or recurring tasks. Skip the follow ups and monitor workloads with automated email reminders.

Task Creation & Management

- A** Managers can easily add a task by filling out the required title and description. Additionally, they can break down the primary task into subtasks for meticulous planning of compliance activities, ensuring no detail is overlooked.
- B** Deadlines are easily set using an integrated calendar. If tasks need to be repeated (e.g., quarterly or annually), this can be specified, ensuring that ongoing or recurring projects remain on track. Setting and tracking deadlines ensure continuous adherence to environmental regulations, avoiding potential regulatory actions.
- C** Tasks promotes punctuality by allowing users to set reminders, delivered via email, for impending tasks. For increased flexibility, multiple reminders can be set for a single task. With timely reminders, you can stay ahead of your compliance obligations, eliminating last-minute rushes.
- D** When creating a task, users can specify the related facility and add relevant tags. Associating tasks with specific facilities ensures that each site remains compliant, providing a unified approach to environmental compliance, and breaking down silos.
- E** Specific individuals can be assigned tasks, and 'watchers' can be added to monitor the tasks's progress, helping to set expectations and enable oversight.
- F** To facilitate comprehensive task completion, users can add relevant internal or web links like regulatory references. Additionally, users can upload crucial documents related to the task. Housing all of these often disparate resources in one place saves time for existing staff, and any potential new hires who need to get up to speed.

One Unified Platform, Endless Benefits

Maintain continuous compliance

Determine regulatory applicability and submit last mile EPCRA Tier II and RCRA reports to all 50+ state portals, pay fees and collate mailers, digitize SDSs, monitor generator statuses, and manage your tasks and projects.

Discover new insights

A single pane view gives you visibility into previously blackboxed processes and proprietary and governmental data sets, so you can standardize and centralize data across your footprint, empowering your team to optimize for results that drive value and impact.

Drive business continuity

Bolster business continuity plans by standardizing compliance data collection, records retention repositories, and training processes to ensure operational continuity and consistency in the face of disruptions.

The most innovative EHS teams are transforming their compliance programs with Encamp

47%

Increase in data confidence

By accessing all the data in one single place.

60K+

Hours saved annually

By automating report submissions, fee payments and more.

\$MM

Environmental risk protection

Can save millions of dollars in time savings and fines.

"We needed to transform from this very manual way that we were managing compliance into a more systematic, a data-driven compliance methodology."

Stephanie Sparkman,
Amazon

"Your solution is unique in that it's the only one in the industry that can automate data collection and standardize it, while automating the reporting, submissions and fee payments. It's been a game-changer for us."

Mason Baziw, Sr. Manager
of ESG and Sustainability,
TopBuild

"I work with a lot of different kinds of vendors and consultants, but Encamp is in a league of its own with its quality and service."

Andrew Kavanaugh,
EHS Manager, World Group
