

# Automated Tier II Reporting for Consultants

Encamp’s EPCRA suite for EHS consultants lets you automate and streamline Tier II reporting for all your clients’ facilities, across all 50 states and territories. Encamp is a cloud-based Software-as-a-Service (SaaS) solution that enables you to deploy and implement our platform quickly and begin adopting even faster.

Our automated Tier II Reporting module is a first-of-its-kind solution designed entirely from a consultant’s perspective and the only out-of-the-box reporting solution on the market today. It’s the same technology that’s made Encamp the largest third-party filer of Tier II reports in the EHS industry.

## One environment for total control

Encamp’s modern and intuitive solutions put your team in total control, making compliance reporting faster and more accurate. And because you get more done in less time – for more clients – you’re able to increase your profit margins accordingly.

### Central login for all users on your team

All team members access Encamp through a web browser, allowing them to work from anywhere.

### Single source of the truth

Create profiles for each facility in a client’s organization and easily keep track of products, storage locations, onsite inventories, Safety Data Sheets, site plans and more. Also centralize current and previous Tier II reports, invoices and receipts for easy access.

### Full transparency for reporting

The Tier II Dashboard and its Partner Mode keeps facility info, reporting tasks and data in full and constant view.

### Built-in QA/QC process

Your team confirms data and tracks reporting progress at every step, resulting in more accurate Tier II reports submitted on time. You also reduce the risk of exorbitant fines for clients.

### One place to manage all your clients

Consolidate all your client accounts and their reporting tasks to the Encamp Platform and manage them more effectively..

## How it Works: Gather client data, Encamp handles the rest

Using Encamp, your team members collect and organize chemical inventories, calculate thresholds, generate Tier II reports for each facility, review it, make corrections, and then hit submit. Our *Encamp Fulfillment Engine* takes care of the rest, including paying state and local filing fees on your clients' behalf and submissions and notifications to LEPCs, SERCS and fire departments. You can track the process for each Tier II report using our out-of-the-box Tier II Dashboard Module.

### One environment for total control

#### UNDERSTAND

One platform to simplify reporting requirements and turn them into easy-to-understand compliance profiles

With built-in state requirements and QA/QC validation, your team can use Encamp for all 50 states

#### INTEGRATE

A single unified portal to track chemical inventories and make hazardous chemical threshold determinations

With a real-time dashboard, you know the status of every report for your clients

#### COMPLY

Submit your clients' reports for every facility, in every state directly from Encamp

Encamp submits all notifications to LEPCs, SERCS and fire departments on your behalf

### Fee structure

You pay an annual subscription fee to use the Encamp Platform and EPCRA suite for EHS consultants, plus a usage fee for each report submitted through Encamp. Once reporting season is over, we send you a consolidated bill for your usage fees (based on number of report submissions and complexity of reporting) and pass-through costs for state and local filing fees.

### Support & Success

Your annual subscription includes our premier Customer Support, which is available Monday through Friday 9am - 5pm ET, access to our Knowledge Base, which is full of "how to" articles and videos, and a dedicated Customer Success Manager to guide you through implementation, onboarding, and user adoption.
